Auditor's Responsibilities for the Audit of the Special Purpose Financial Statements under the Project

Our objective is to obtain reasonable assurance on whether the special purpose financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence economic decisions of users taken on basis of these special purpose financial statements.

Within the frames of the audit held in accordance with the ISAs, we apply professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the special purpose financial statements whether due to fraud or error; design and perform audit procedures responsive to those risks; obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than that resulting from an error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control system;

- obtain an understanding of the internal control system relevant to the audit, in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control system;

- evaluate appropriateness of the accounting policies used and reasonableness of accounting estimates and related disclosures made by the Management;

- evaluate presentation of the special purpose financial statements as a whole, their structure and contents, including disclosures, as well as whether the special purpose financial statements present the underlying transactions and events in a manner that ensures their reliable representation.

We communicate with the Management and those charged with governance regarding, among other matters, the planned scope and timing of the audit as well as significant audit findings, including any significant deficiencies in the internal control system that we identify in the course of the audit.
